Date of Birth: 2002-02-28

Highest Level of Education: Undergraduate

Industry: Information Technology, Software Development

Work Experience

Owner of Real-time voting application

Votify

January 2023 to Present

The project name is Votify. This project is a full-stack voting application that enables its users to create and manage an election. I built this project completely from scratch all by myself.

This project was built with the intention of making sure all modern and advanced web features like Cross-browser compatibility, Image standards and optimization, web fonts, Responsive design, Email content etc. are fully implemented.

Building this project greatly improved my skill as a web developer and it gave me the opportunity to work with modern technologies like Redux, JWT, protected cookies, advanced querying etc.

- Integrated JWT, Mongo Atlas, bcrypt frameworks for Authentication and persistence.
- Using React and Node to search text based on the image uploaded by users.

Full Stack Developer (MERN Stack)

Upwork - Abuja

January 2021 to Present

- Developed code following common security practices and development design patterns
- Wrote 200+ unit tests to verify the functionality of user interfaces, back-end processing, connectivity, and non-relational database interactions
- Maintained 8+ systems and applications as Tier 2 support (break-fix and data changes)
- Documented 100% of technical specifications and dependencies of applications.
- Participated in the planning and execution of 10+ business continuity/disaster recovery exercises.

- Implemented 25+ system and application designs
- Technically Sophisticated Professional with 3 years of experience in the areas of Software Development and Team Management.
- Strong algorithmic and debugging skills.

React Developer

Fiverr - Abuja

January 2020 to January 2021

- Built responsive websites for 40+ customers using semantic HTML5, JavaScript, ReactJS, and CSS compiled using maven and webpack build tools.
- Created Java OSGi bundles for cache invalidation, REST APIs, and web form response handling in the first 30 days of employment.
- Developed code that deals with large data sets by rendering components on UI and optimizing calls to minimize HTTP requests by 80%.
- promoted improved component lifecycle management procedures, which improved turnaround time by 74% from prior years.
- worked with ten or more senior team members to upgrade 150 or more customers' websites to keep up with evolving industry standards.
- pioneered the use of isomorphic React and Node.js for more than 40 web applications, resulting in a 69% reduction in load times.
- Within a week of joining the company, I tested, installed, configured, and troubleshot more than 30 software packages.
- Performed quality control testing using Jest/Enzyme.
- Leveraged knowledge in MERN Stack, Git, Heroku and Debugging
- Established remote deployment using Digital Ocean and storage using AWS S3.
- Created many react app with advanced state management like Redux.
